THE SOLUTION

Ecolane Evolution is a modern software solution for the management of demand response transportation. The fully automated continuous real-time schedule optimization provides the most efficient scheduling and dispatching available on the market today. Ecolane Evolution is securely accessed via any standard web browsers and incorporates industry-leading tools to effectively monitor operational processes and resources.

By implementing Ecolane Evolution, organizations responsible for transit operations gain flexible scheduling functionality and improve the quality and responsiveness of their customer support. Multi-level schedule optimization enables more accurate forecasting, better planning and tighter coordination. The result is maximized efficiency and productivity in an agency's use of their resources. For agencies requiring local, state and federal reporting features, Ecolane Evolution provides detailed analyses of transit performance, which can be exported into various industry file formats.
