

# Ecolane DRT for PACE

Ecolane 

Focusing on PACE Participant Mobility

[www.ecolane.com](http://www.ecolane.com)

## The Product

**Ecolane's DRT for PACE is the most effective and efficient software solution for the management of transportation for PACE agencies everywhere. It is securely accessed via standard web browsers and incorporates industry-leading tools to most effectively monitor operational processes and resources. Real-time optimization capabilities allow for the most efficient scheduling and reporting approach available on the market today.**

By implementing Ecolane DRT for PACE, organizations responsible for transportation gain flexible scheduling capabilities and are able to elevate the quality of their customer support for PACE participants. Ecolane software can effortlessly rebuild schedules around cancellations as well as manage trip modifications on the fly. Optimizing schedules enabling more accurate forecasting, better planning and tighter coordination of an agency's fleet management with instant communications through multiple MDT platforms. All together allowing PACE center staff, home healthcare workers, participant caregivers, medical and social worker teams the ability to monitor all transportation schedule needs in real time.

## DRT for PACE Highlights

- ✓ Fully automated, hosted scheduling and dispatching solution
- ✓ Real-time communications between centers, drivers, and dispatch manager
- ✓ Industry-leading reporting with export capabilities
- ✓ Improved on-time performance and participant service monitoring
- ✓ GPS-verified pickup and arrival
- ✓ Real-time reporting available on attendance and no-shows
- ✓ Minimal driver input for improved safety with monitoring
- ✓ Designed for ease-of-use, reducing training time and costs
- ✓ Web-based and accessible from desktop, tablet & even most smart-phone based browsers
- ✓ Automated scheduling allows same day and emergency changes to be quickly routed and communicated when needed

# Additional Features & Highlights

## Enhanced PACE-friendly modules

Customized Management Portals enabling participant management between facilities and agencies

Service feedback allows robust reporting of accidents/incidents

Tools to connect to EMR/EHR systems provide seamless operations between departments

## Real-time Schedule Optimization

Complete scheduling effectiveness and estimated stop time accuracy control, minimizing participant ride times

Automatic assignment and dispatch of trips, to and from PACE centers, outside medical appointments and field trips

Fully web-based tools for administering users, vehicles, service rules, and schedules

## Custom Reporting & Data Monitoring

- ✓ Ability to track on-board time, on-time performance, distance traveled, number of participants
- ✓ Real-time distribution of reports for Average Daily Attendance (ADA) and no-shows / cancellations.
- ✓ Real-time run & vehicle productivity reporting
- ✓ Daily service variations can be managed proactively
- ✓ Run pool tool helps dispatchers zero in on specific PACE center run/vehicle drivers
- ✓ Groups tool allows PACE to tailor schedules in and out of centers at specific times

## Fleet Management

Real-time scheduling change management and instant schedule change communication via Ecolane MDT (mobile data terminal)

Visibility - Allows you to see and measure individual driver performance and track participants in real-time

## Mobile App

Industry-leading mobile app add-on provides visibility and trip management capabilities for participant families and home healthcare workers

## Cost Savings

Fully-hosted environment reduces reliance on hardware purchases and dedicated IT manpower

Increase productivity of existing drivers while reducing hours, fuel usage and vehicle maintenance costs

Manage schedule changes on day of service

Transport more participants with the same number of resources while increasing service
